

Commercial or residential, complex or simple, interior or exterior, experienced or first time — iForm from Reward Wall Systems is always the right fit. iForm, our flagship ICF (insulating concrete form), is actually a suite of products designed to produce steel-reinforced concrete walls that are straight, square and plumb—and buildings that are strong, safe and energy efficient.

This innovative ICF line includes four sizes – 9-inch, 11-inch, 13-inch, and 15-inch – in different configurations – straight, 90° and 45° corners, and a ledge form with our own unique, patent-pending reinforcement system – xLerator. So, with Reward's iForm you have exactly what you need to get the job done, without the delays of custom orders or the need to fabricate and "field cut" on the job. That means you save time, money and concrete. No wonder Reward Wall Systems is one of the industry's leading manufacturers of ICFs and one of the most-specified among builders nationwide.

Benefits That Really Stack Up

- **Universal Fit For Less Waste** – There is no top or bottom, no right side or wrong end with iForm. Even corners work as either left or right. And cut pieces can be reused to eliminate waste.
- **Unmatched Strength** – Six-inch horizontal center ties and 8-inch vertical center ties provide unmatched strength during concrete pours.
- **Multiple Rebar Positioning** – Choose between inside, middle and outside rebar positioning, plus stagger or alternate rebar positioning on different courses.
- **Snap & Go Rebar** – Eliminate improperly bent or crooked rebar with the snap-in design that even allows you to overlap ends or two pieces of horizontal rebar at once.

- **Quick Concrete Flow** – Open tie design reduces damming and eliminates deflection between ties and the block.
- **Minimal Bracing** – Achieve a straighter, truer structure with minimal bracing, even around door and window openings and corners.
- **Quick Installation** – Beveled interior edges offer quick installation and assembly, even with complicated floor plans. Plus, the open 1-inch tooth design reduces dirt, debris and ice.
- **Speeds Finishing** – Use a router or hot knife to easily create channels for wiring and plumbing. Plus, iForms accept any interior and exterior finish, without adding steps.
